YOUR CKD PATIENT MOTIVATOR FOR IMPROVED OUTCOMES

Risa Simon is remarkably successful preemptive kidney transplant recipient who believes all Chronic Kidney Disease (CKD) patients deserve an opportunity to seek quality of life choices. While recognizing her own sinking-ship prognosis was actually the way to the buried treasure, she leveraged her gems to pave her way. Risa now shares her revelations and ground-breaking systems to navigate all CKD patients to a more enlightened path.

RISA FLIPS THE SWITCH TO FULL STEAM AHEAD...

Risa presents her message the way she wished she would have heard it when she was first diagnosed, and at the first sign of renal function decline. Her style is compassionately relevant, and she articulates facts, feelings and commonsense straight-talk to propel CKD patients to *PRO*-action. While telling her story Risa exposes all the “wrong-thinking” and the plethora of procrastination pitfalls which instantly connect her audience with a feeling of “she gets me!” Risa’s goal is two-fold. While she’s helping CKD patients get “unstuck” before illness advances (so they can take advantage of best life outcomes); she’s also shaking-up the nation to recognize the urgent call for humanitarian volunteerism in living kidney donation - so best choices can be optimized.

RISA’S EMPOWERMENT PROGRAMS SAVE LIVES & IMPROVE OUTCOMES

Risa offers valuable CKD patient tips, such as how to develop a thirst to learn and how to discover which treatment modalities serve their best interest, and which ones don't. Her advice to patients: “Become an advocate and enlist yourself as your chief investigative agent. You need to drive the bus and expose the man behind the curtain who claims dialysis is good. Dialysis is only good when you can avoid it!

RISA’S PROACTIVE SYSTEMS OFFER PATIENTS UNPARALLELED ADVANTAGES

After recognizing the cold hard facts surrounding the organ shortage, Risa took advantage of her own tips and developed a proven system to help CKD patients avoid dialysis so they could live the best life possible. As a fierce advocate for preemptive transplant and living kidney donation, Risa reveals how she refused to accept the “get sicker first” plan, often implied by doctors. Today, she is living a healthy, vibrant life - free of dialysis, and she wants all CKD patients to get the chance to have what she’s having. If your renal group or transplant center is looking to motivate patients to strive for improved outcomes...

...ask Risa to show them the way!
